

WalletSwap
LitePaper v1.0

Introduction

WalletSwap is a decentralised Binance Smartchain & Ethereum based Web3 Mobile Wallet. The app works with several crypto tokens and blockchain wallets. It enables users to store, send and receive Smart Chain & Ethereum based tokens on the go.

These functions are designed with a focus on user experience, providing a full suite of features for naive and seasoned enthusiasts.

WalletSwap offers a seamless user experience. As we believe that ease of use is vital in the adoption of cryptocurrencies, the highly intuitive and user-friendly mobile application for accessing the blockchain.

Mission

Our mission is to create the ultimate token wallet that boost interchain and multi-chain compatibility—while providing a superior user experience through an intuitive UI. We envision a wallet that empowers individuals to access decentralised Finance (DeFi) technology.

Vision

WalletSwap believe in the future of blockchain and aims to make the interplay of blockchain more practical by making your mobile device competent for all kinds of blockchain interactions.

There are six key reasons why we believe blockchain technology is about to bring some profound changes to this industry, busting the finance monopoly, and offering individuals and institutions alike real choice in how they create and manage value.

Attestation: For the first time in history, two parties who neither know nor trust each other can transact and do business. Verifying identity and establishing trust is no longer the right and privilege of the financial intermediary.

Cost: On the blockchain, the network both clears and settles peer-to-peer value

transfers, and it does so continually so that its ledger is always up to date.

Speed: The shift to instant and frictionless value transfer would free up capital otherwise trapped in transit, bad news for anyone profiting from the float.

Risk Management: Blockchain technology promises to mitigate several forms of financial risk. Financial institutions are already using blockchain technology to record, exchange, and trade assets and liabilities, and could eventually use it to replace traditional exchanges and centralised markets, upending how we define and trade value.

Open Source: The financial services industry is a technology stack of legacy systems standing twenty miles high and on the verge of teetering over.

These benefits—attestation, dramatically lower costs, lightning speed, lower risks, great innovation of value, adaptability—

have the potential to transform not only payments, but also the securities industry, investment banking, accounting and audit, venture capital, insurance, enterprise risk management, retail banking, and other pillars of the industry.

In conclusion, blockchain has great functionality to offer and our vision is to use this revolutionary technology to transform people's lives in their dealings with the day to day services.

Wallet Ecosystem

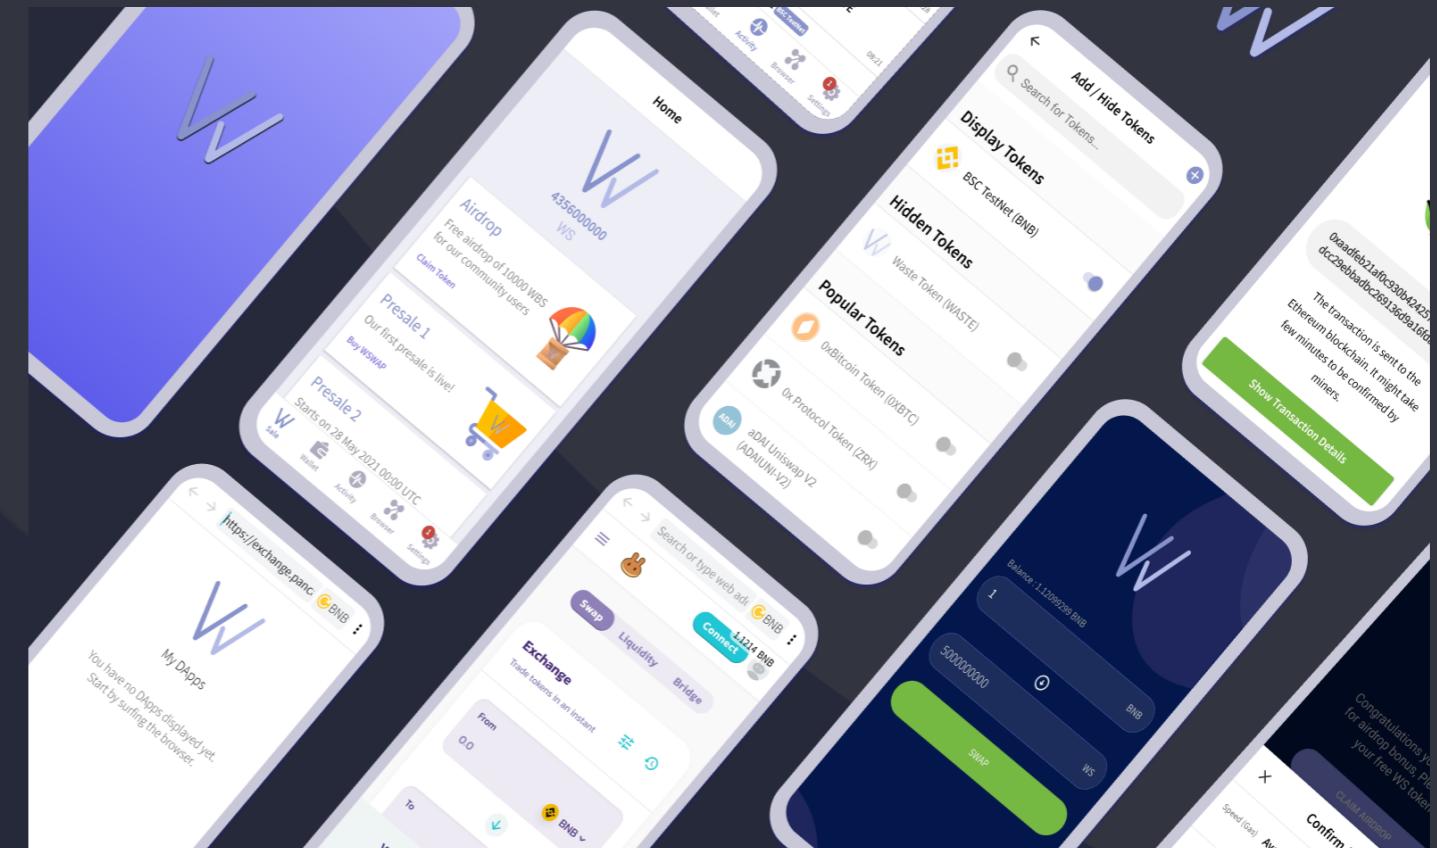

WalletSwap Application works with several crypto tokens and blockchain wallets. Enabling users to store, send and receive Ethereum and Smart Chain based tokens with ease. Few important features are described below.

Rich Token Experience

Enjoy a native-experience with TokenScript enabled tokens. Store and manage feature rich NFT Tokens, game tokens and ENS, along with your ETH and BSC currencies.

User Friendly UI

Beginner-friendly with no hidden fees or tech background needed. Just launch the

app create your wallet and start interacting with blockchain.

Backup & Recovery

Anybody who has your seed phrase can steal your cryptos. WalletSwap provides user-friendly 12-word secure key backup, management and recovery. Biometric and pin support. WalletSwap wallet utilises Secure Enclave, giving you cold

wallet level security.

Advanced Web3 Browser

Interact and access the dApp ecosystem: DeFi, marketplaces, games and everything else directly from the Web3 Browser with Integrated interface that is fully optimised for mobile so you can enjoy the content designed specifically for your device.

Ecosystem Overview

Create in-app wallets, store, receive and transfer token easily in a 'one stop shop' experience.

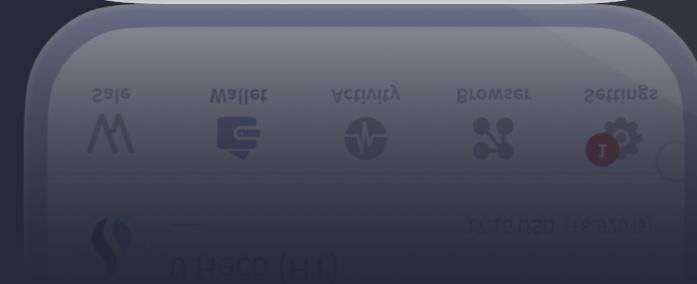

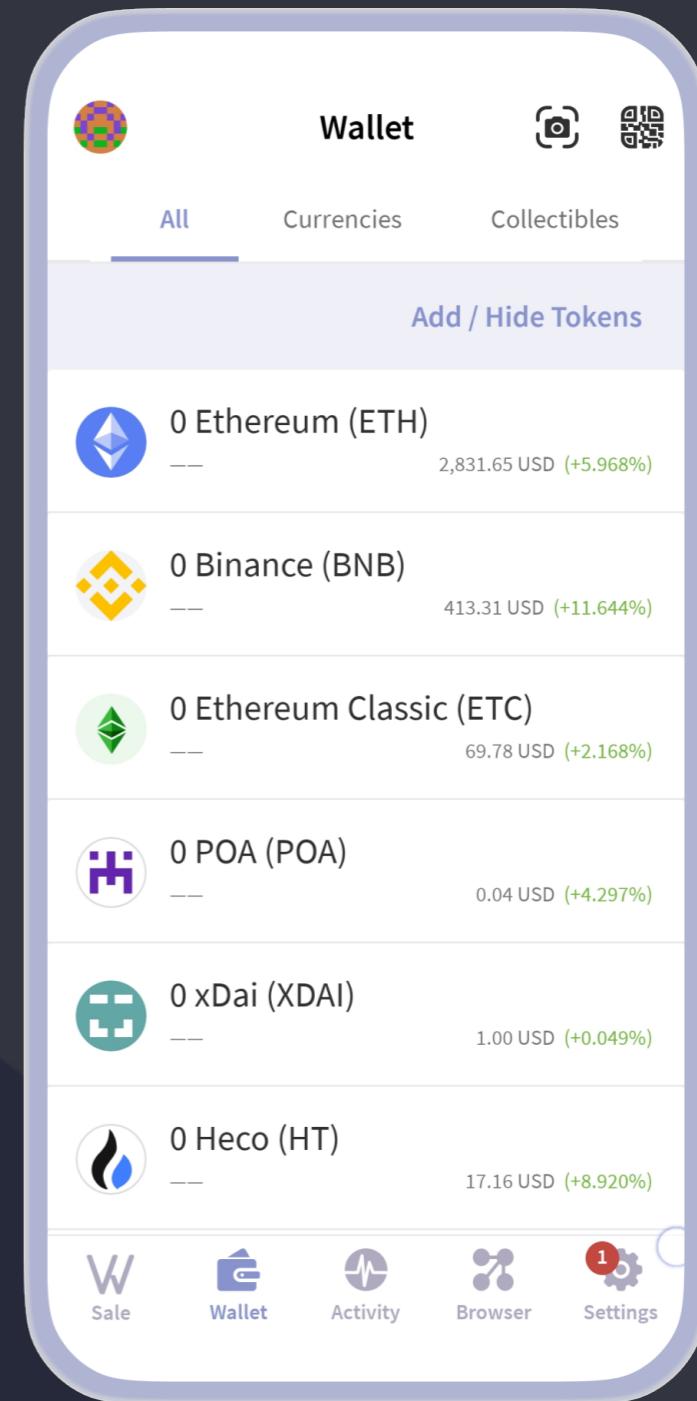

Secure your assets with Private Keys, Mnemonic Phrases, 2-Factor Authentication, and more.

Beginner-friendly with no hidden fees or tech background needed.

Browse and connect to the decentralised web sites using built in powerful Web3 browser.

WSWAP Token

WSWAP will be the preferred token in our ecosystem. As the preferred token we plan to use the WSWAP Token for staking, governance, paying transaction fees and gaining eligibility in WalletSwap launch pool. Let's understand them in details.

Staking

Staking is an activity where a user locks or holds his funds in a cryptocurrency wallet to participate in maintaining the operations of a proof-of-stake (PoS)-based blockchain system. It is similar to crypto mining in the sense that it helps a network achieve consensus while rewarding users who participate.

Users will be able to stake WSWAP directly from your WalletSwap app and the rewards will be added back to their wallet on harvesting.

Governance

Blockchain governance happens directly on the blockchain protocol. That is, any proposed changes or decision making processes must be embedded into the network code. This type of governance empowers the platform token holders (or node controllers) to be the main force behind company decisions and submit their vote on any new developments. This system will not follow a 1-node-1-vote

principle, but rather depend on how many native coins every node is holding. On-chain governance bears the additional benefit of fast decision making, subject to a properly working design.

WSWAP token holders will influence decisions concerning the project such as proposing or deciding on new feature, proposals and even changing the governance system itself

Transaction Fess

WSWAP powers the WalletSwap ecosystem and provides discounted trading fees for users. Users can use WSWAP to pay for swap and transaction fees on the WalletSwap Mobile Wallet. Users can also enable/disable this function from the mobile app itself once this feature goes live.

Miniting NFTs

Non-fungible tokens took the art world by storm earlier this year. NFTs are a type of digital asset designed to show someone has ownership of a unique virtual item, such as online pictures and videos or even sports trading cards.

Minting is a fancy term for creating. Creating an NFT is actually a surprisingly simple process.

WalletSwap provides an easy way to store and access all your crypto collectibles with peace of mind and security. Crypto

collectibles are secured on the blockchain and associated with a public address. Over the last few years, we have seen various versions of crypto collectibles such as CryptoPunks. WalletSwap will allow WSWAP holders to upload and list digital artworks in the WalletSwap NFT marketplace.

LaunchPool Eligibility

WalletSwap Launchpad will be a full-service launchpad for new block chain projects who want to benefit from the security and trust lessness that smart contracts can provide. WSWAP token holders will be eligible to participate in WalletSwap launch polls.

Use Case Overview

Staking: Users will be able to stake WSWAP directly from their WalletSwap app and earn crypto rewards.

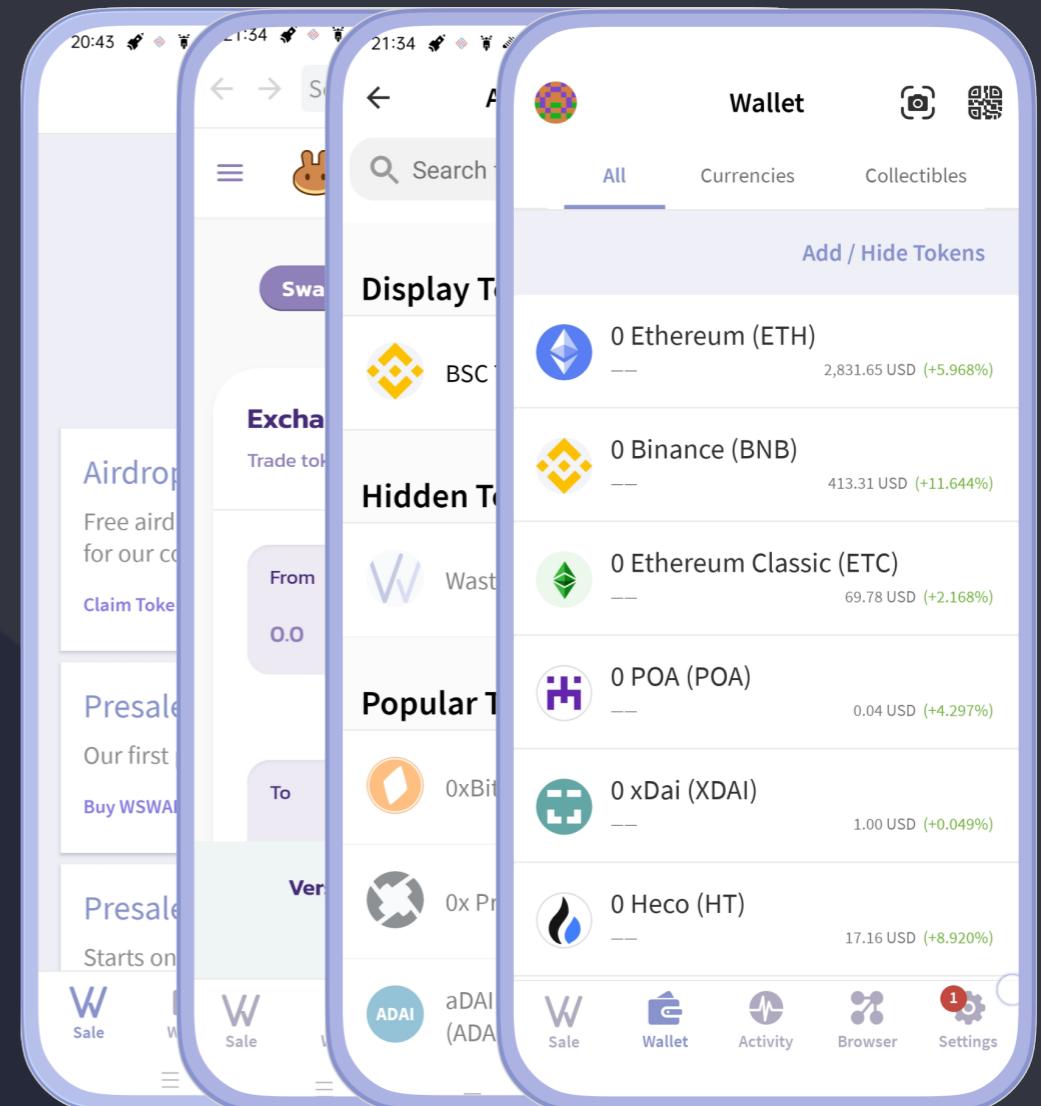

Governance: WSWAP token holders can influence decisions concerning the project.

Fee: WSWAP Token will be used for paying transaction fees.

Launchpad: Gaining eligibility in WalletSwap launch pools.

WSWAP Token Details

Website	https://wswap.site/
Name	Wallet Swap
Symbol	WSWAP
Decimals	0
Type	BEP20
Network	Binance Smart Chain
Contract Address	0xc72cc401122dbdc812ec88a2150aad5a39467401
Maximum Supply	10,000,000,000,000 (10 Trillion)

WSWAP Airdrop

Title	Airdrop
Token	Wallet Swap (WSWAP)
Airdrop Start Date	12 June 2021 12:00 UTC
Airdrop End Date	30 June 2021 12:00 UTC*
Claim Location 1	https://wswap.site/
Claim Reward Website	1,500,000 WSWAP/Claim
Claim Location 2	WalletSwap Android Application
Claim Reward Mobile App	1,800,000 WSWAP/Claim (20% Bonus)
Tokens Allocated to Pool	500,000,000,000 (500 Billion)
Supply in Percentage	5% of Max Supply
Referrer Bonus	50% Commission

Conditions Apply

*Airdrop may end early if allotted tokens are claimed before.

WSWAP Presale 1

Title	Presale 1
Sale Start Date	1 July 2021 12:00 UTC
Sale End Date	5 July 2021 12:00 UTC *
Sale Location 1	https://wswap.site/
Fixed Sale Price (From Website)	4,000,000,000/BNB
Sale Location 2	WalletSwap Android Application
Fixed Sale Price (From Android App)	4,800,000,000/BNB (20% Bonus)
Funding Methods	BNB
Spend Limit	0.1 BNB to 4 BNB
Softcap	180 BNB
Hardcap	220 BNB
Supply for Sale	1,500,000,000,000 (1.5 Trillion)
Supply in Percentage	15% of Max Supply
Referrer Bonus	50%

Conditions Apply

*Presale 1 may end early if allotted tokens are claimed before.

WSWAP Presale 2

Title	Presale 2
Sale Start Date	7 July 2021 12:00 UTC
Sale End Date	17 July 2021 12:00 UTC*
Sale Location 1	https://wswap.site/
Fixed Sale Price (From Website)	3,000,000,000/BNB
Sale Location 2	WalletSwap Android Application
Fixed Sale Price (From Android App)	3,600,000,000/BNB (20% Bonus)
Funding Methods	BNB
Spend Limit	0.1 BNB - 6 BNB
Softcap	300 BNB
Hardcap	390 BNB
Supply for Sale	2,000,000,000,000 (2.0 Trillion)
Supply in Percentage	20% of Max Supply
Referrer Bonus	50%

Conditions Apply

*Presale 2 may end early if allotted tokens are claimed before.

WSWAP Presale 3

Title	Presale 3
Sale Start Date	23 July 2021 12:00 UTC
Sale End Date	31 July 2021 12:00 UTC*
Sale Location	**
Fixed Sale Price	2,000,000,000/BNB**** (Est.)
Fixed Sale Price (From Android App)	N/A
Spending Limits	0.1 - 8 BNB
Funding Methods	BNB
Supply for Sale	2,500,000,000,000 (25% of total supply + Unsold tokens from Presale 1 & Presale 2)***
Softcap/HardCap	1000/1250 BNB^
Referrer Bonus	N/A*****

Conditions Apply

*Presale 3 may end early if allotted tokens are sold before.

**Sale Location : Presale 3 may take place on [wswap.site](#) or [dxsale.app](#) or [unicrypt.network](#)

*** Supply for sale may vary as all the unsold tokens from Presale 1 and Presale 2 will be added to the Presale 3 token pool.

Unsold tokens from Presale 3 will be burned immediately after the sale is over.

****The fixed selling price for Presale 3 may vary depending on the number of unsold tokens from Presale 1 and Presale 2 is added to the token pool.

^Presale 3 soft cap & hard cap may vary depending on the success of the previous Presales.

*****If Presale 3 does not occur on [wswap.site](#), no referral bonuses will be offered.

WSWAP Listing Details

Title	PancakeSwap Listing
Listing Date	1 Aug 2021 12:00 UTC - 3 Aug 2021 12:00 UTC*
Exchange	https://exchange.pancakeswap.finance/
Initial Liquidity	60%
Liquidity Lock Period	1 Years
Price	1,200,000,000/BNB**
Liquidity Pair	WSWAP/BNB

Conditions Apply

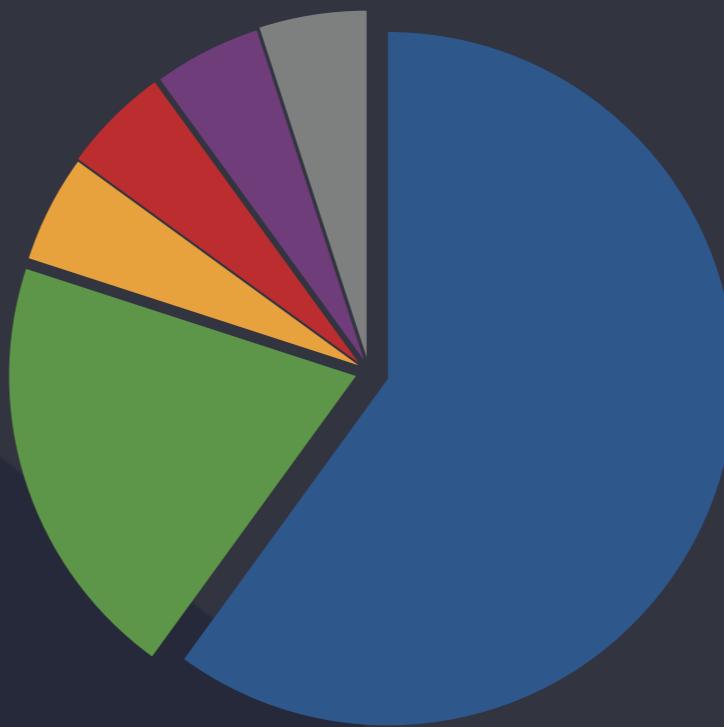

*WSWAP Listing will take place during the specified period

***The listing price may vary depending on the success of the presales.

A presale is considered a success if the soft cap is reached.

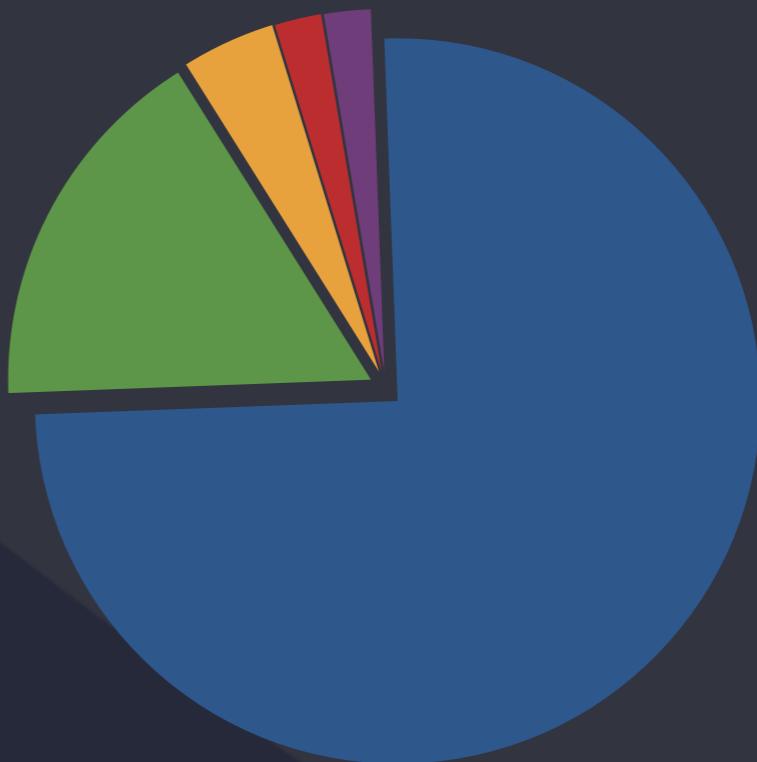

Tokens Distribution

- Presale (60%)
- Public Sale (20%)
- Airdrop (5%)
- Team (5%)
- Development (5%)
- Bounty (5%)

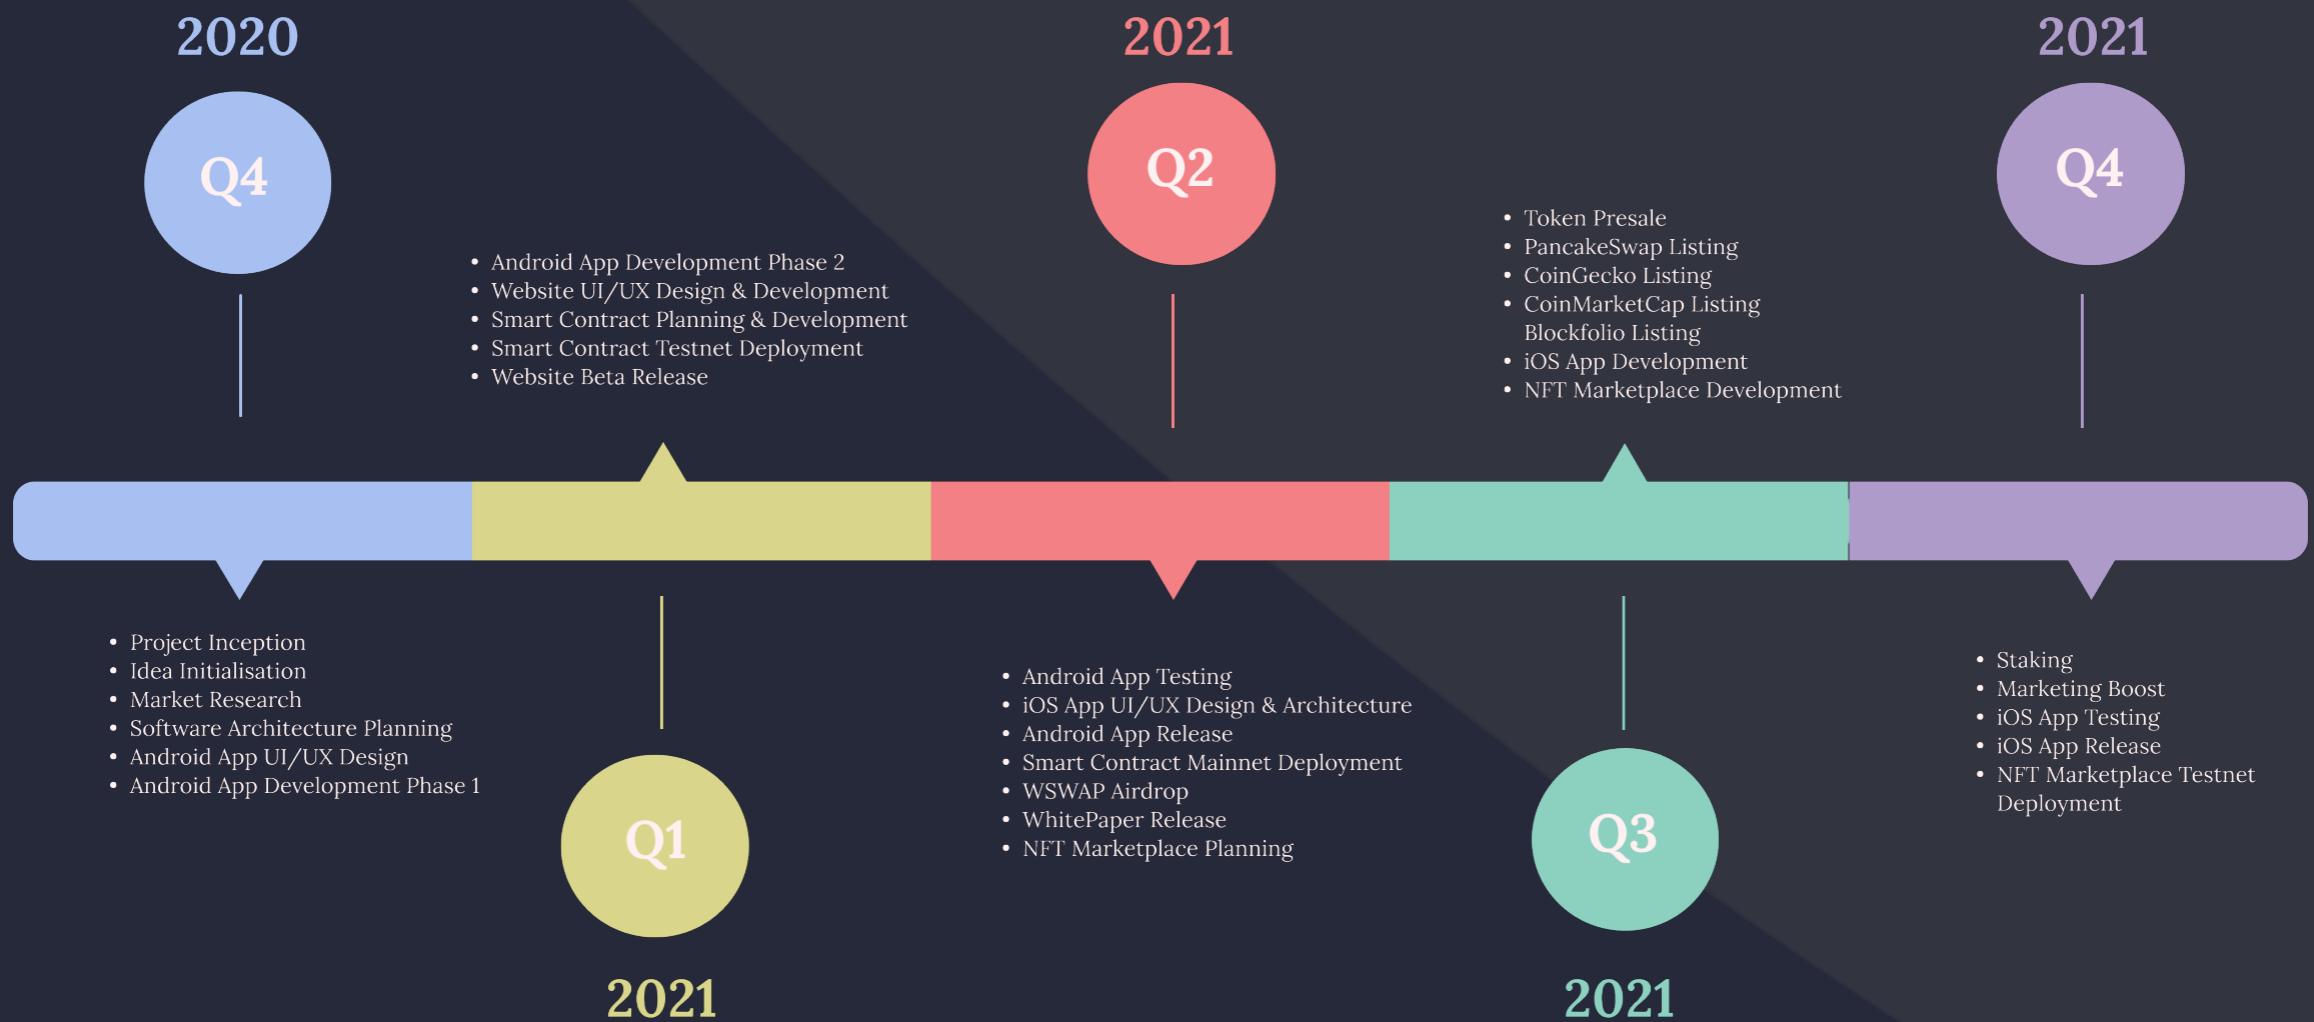

Funds Allocation

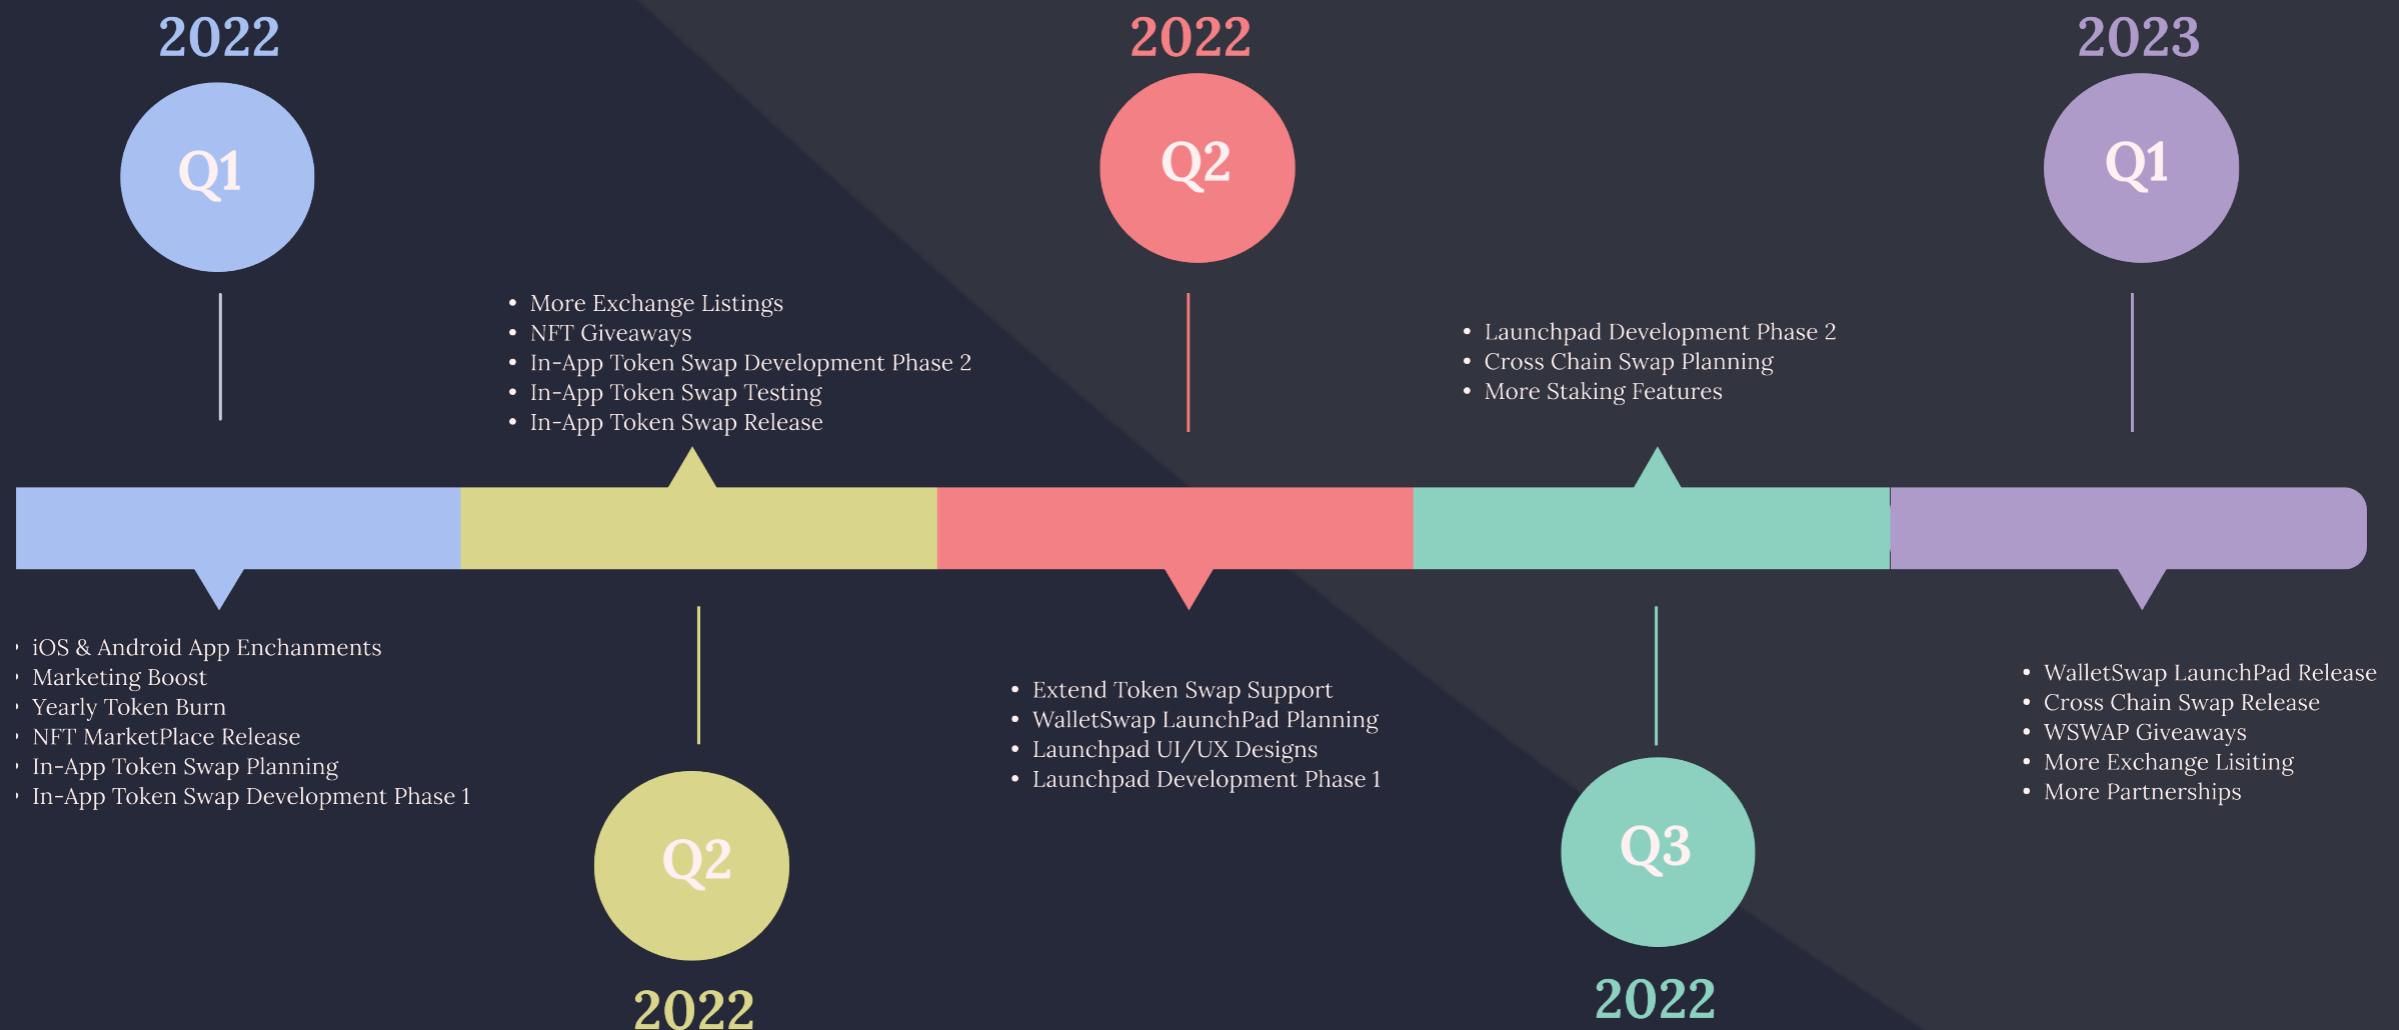

- Initial Liquidity (60%)
- Product Development (20%)
- Marketing & Sales (10%)
- Legal Expenses (5%)
- Overhead Expenses (5%)
